Project definition

Videogame version of the TV show Wheel of fortune.

The game will let you feel as if you were one of the contestants with the same excitement, let alone the fun you will have with your family and friends.

The target audience is all public.

Organization

WhatsApp group: <https://chat.whatsapp.com/I85ZSqhg8qMCt560tz7ahp>

- To address procrastination, we will set internal deadlines before official ones to ensure progress. Also decision-making will be balanced by discussing options as a group before finalizing.
- Team building activity: We did a “Two truths and a lie” activity to get to know each other better.

Optional

- Group vision: to create an engaging, well-designed Wheel of Fortune game while improving our teamwork and technical skills.
- Project definition: a digital version of Wheel of Fortune that offers an interactive experience for players of all ages.
- Work process: weekly meetings on Discord, task assignments via GitHub and a shared Google Drive for documentation.
- Strengthening the group: we will have a quick debrief at the end of each meeting to address any issues and keep running things smoothly.
